PROFILE

> Self-taught web developer focused on building useful, user-friendly digital products. I work across frontend and backend development, creating responsive interfaces, APIs, databases and practical product workflows. I care about clarity, usability and making ideas easier for people to use.

SELECTED PROJECTS

QuickTest

Live project

A learning website that helps students practise questions and check their scores. Used by 100+ users.

Gbengaayo Catering Services

Live project

A welcoming website that helps a catering brand present its service, menu and event enquiries clearly.

StudyStream

Live project

A study tool that turns long school documents into clearer notes, summaries and key points.

TaskUp

GitHub

A simple task organiser that helps people keep priorities visible and stay on top of their work.
