PROFILE

Graphic designer and Computer Science student with practical experience creating digital graphics, branding concepts, apparel designs, and visual interfaces. Proficient in **Adobe Photoshop and Canva**, with experience using **Google Stitch** for modern interface and visual concepts.

I enjoy turning ideas into clean, distinctive visuals and have experience working across branding, digital content, web visuals, and product interfaces. My background in web development also gives me a strong understanding of digital layouts and how visual designs are used in websites and digital products.

SELECTED DESIGN WORK

ECHOES

Brand Identity & Apparel Design

Independent clothing brand focused on distinctive Nigerian street culture and visual storytelling.

- Developed visual concepts and graphic directions for apparel.
- Designed concepts for branded polos and custom accessories.
- Worked with typography, imagery, composition, and placement across physical products.
- Developed visual ideas around the brand's identity and “from the street to the stars” concept.

GBENGAAYO CATERING

Website Visual Design

- Designed the visual presentation and layout of a catering business website.
- Worked with typography, imagery, spacing, hierarchy, and overall page composition.
- Created a clean interface designed around presenting the business and its services effectively.

DIGITAL PRODUCT INTERFACES

UI & Visual Design

Worked on the visual and interface side of several personal digital-product projects, including **Avio, Chainchat, Iclick, StudyStream, and ChatMe**.

- Designed and structured digital interfaces for web-based products.
- Worked with layouts, typography, visual hierarchy, and user-facing components.
- Applied design principles to make digital products clear and easy to navigate.

DESIGN EXPERIENCE

Independent Graphic Designer

Personal & Collaborative Projects

- Create graphics, branding concepts, digital layouts, and visual assets using Adobe Photoshop and Canva.
- Develop visual directions for brands, products, and digital platforms.
- Experiment with typography, composition, imagery, and visual hierarchy to communicate ideas effectively.
- Create designs for both digital platforms and physical products.
- Work from ideas and rough concepts through to polished visual designs.

Web & Digital Product Design

Personal Projects

- Design visual layouts and interfaces for websites and digital products.
- Translate design concepts into functional digital experiences.
- Collaborate across design and development when building personal and collaborative projects.
