## ABOUT ME

I am a self-taught website developer and graphic designer who enjoys turning ideas into practical digital products. I build clean, responsive websites and engaging visual experiences while combining technical skills in web development, UI/UX thinking, and creative design. My work spans frontend and backend development, community-building initiatives, and event media production, with a strong focus on clarity, usability, and visual impact.

## WORK EXPERIENCE

### WEB DEVELOPER / GRAPHIC DESIGNER • 2024 — Present

WALEX Studio • Abuja, Nigeria

• Designed and developed portfolio and client-facing products with clean UI and responsive layouts.

• Built full-stack web experiences using HTML, CSS, JavaScript, Node.js, Express, and MongoDB.

• Created visual assets, promotional designs, and event graphics aligned with project goals.

### FOUNDER & FACILITATOR • 2026 — Present

Upgrade Lab • Abuja, Nigeria

• Facilitated weekly tech learning sessions covering web development, design, and practical digital skills.

• Supported aspiring tech professionals through mentorship, collaboration, and community engagement.

• Created a hands-on environment for learning, idea-sharing, and collaborative growth.

### CO-FOUNDER / BACKEND ENGINEER • 2025 — Present

Avio • Remote

• Contributed to product architecture, API design, and backend systems for a smart wallet platform.

• Worked with database structures and integrations for automated transactions and user flows.

• Supported the development of a practical, user-friendly experience for digital financial tools.
